SUMMARY

Computer Science student at California State University, Long Beach (Minor in Finance) and Software Engineer Intern at HypeOn, a San Francisco AI e-commerce intelligence startup. Builds full-stack web products with Next.js, TypeScript, Python, and Flask in an AI-assisted workflow. Seeking Software Engineering internships for Summer 2027.

EDUCATION

California State University, Long Beach

B.S. Computer Science, Minor in Finance

GPA: 3.56 · Honors: CSULB President's Honor List

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Discrete Math, Computer Organization & Assembly, Linear Algebra, Calculus I–III, Engineering Communications (ENGR 350).

Long Beach, CA

Expected May 2028

EXPERIENCE

Software Engineer Intern, HypeOn · AI e-commerce intelligence platform for D2C brands

San Francisco, CA

May 2026 – Present

- Build and test features for HypeOn's e-commerce intelligence platform, which analyzes signals across search and social channels to surface trending products and ad opportunities for direct-to-consumer brands.
- Write and review application code alongside the engineering team, contributing to product features, fixes, and quality-assurance workflows.
- Act as a bridge between the engineering and go-to-market teams, translating product and customer needs into technical work and technical detail into terms the sales side can use.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C, HTML/CSS

Frontend: Next.js (App Router), React, Tailwind CSS, Motion, Jinja2

Backend: Flask, REST APIs, Stripe, JSON, HTTP, ffmpeg, pytest

Cloud & DevOps: AWS (IAM, S3, Lambda, API Gateway), Vercel, Git, GitHub, Linux, VS Code

AI-Assisted Development: Claude Code, Codex, GitHub Copilot, ChatGPT

PROJECTS

Skyways Hotel — Booking Platform · Next.js, TypeScript, Tailwind, Stripe, Vercel

Live · 2026

- Built and shipped a first-party website and Stripe-powered booking platform for an independent Long Beach hotel, replacing its third-party booking dependency.
- Architected the Next.js (App Router) frontend, TypeScript domain models, and the reservation flow from scratch with secure form handling and validation; deployed via Vercel.

pavanrathod.com — Personal Portfolio · Next.js 16, TypeScript, Tailwind v4, Motion

Live · 2026

- Designed and built a premium animated portfolio with a custom design system, editorial typography, and a long-form scrollytelling layout.
- Implemented prefers-reduced-motion gating, focus management, mobile navigation with a focus trap, and full WCAG AA color contrast across every section; deployed on Vercel.

LBT & The Rider's Data — Web Project (ENGR 350) · HTML/CSS/JS, GitHub Pages

Spring 2026

- Researched how Long Beach Transit and LACMTA's TAP system collect, retain, and govern rider data across 38+ routes and 24M annual rides; mapped two contrasting privacy regimes against California Streets & Highways Code §31490.
- Shipped a responsive, scroll-driven data-storytelling website with custom visuals and a route-stop dataset, and proposed four design recommendations to close the identified privacy gap.

VidSnapAI — AI Short-Form Video Generator · Python, Flask, ffmpeg

October 2025

- Built Flask REST endpoints for an upload → text-to-speech → render pipeline with request validation, file-size limits, and secure filename handling.
- Orchestrated ffmpeg concat/mix/filter pipelines with job-status polling, rate limiting, exponential-backoff retries, and structured logging across the service.

VOLUNTEER EXPERIENCE

Library Volunteer · Los Altos Library, Long Beach Public Library

2024 – Present

- Support 15–30 patrons weekly with public computers, printing, and e-resources; troubleshoot OS and browser issues.
- Set up A/V equipment for community events and built a reusable setup checklist that cut program setup time.
